

# Heading 1

## Heading 2

### Heading 3

---

#### **Heading 6: Formatting the text**

This is a paragraph. Any text may be **bold**, *italic*, underlined, ~~strikethrough (deleted)~~.

The text may also be **marked (highlighted)**. And this is a piece of something looks like an inline code inside a regular paragraph.

You can use superscript (X<sub>2</sub>) or subscript (H<sup>2</sup>O) symbols.

And you can add hyperlinks like [Markdown Guide](#), footnotes<sup>1</sup> (LINE BREAK) and date/time.<sup>2</sup>

See also other other add-ons.

#### **Blocks of text**

Lists are ordered:

1. First
2. Second
3. Third

or unordered:

- Bird
- Chat
- Dog

Definition list:

**Frau** weiblicher erwachsener Mensch  
Ehefrau

 This is a citation (blockquote).

And code block looks like with a code language definition:

```
/python/  
print("Hello, World!")
```

and without it:

```
Some text.
```

| Product      | Qty      | Price         |
|--------------|----------|---------------|
| Apples       | 2        | \$3.00        |
| Bananas      | 3        | \$1.50        |
| Cherries     | 1        | \$4.00        |
| <i>Total</i> | <i>6</i> | <i>\$8.50</i> |
